ProWall® Advanced Reconfigurable Containers

ProWall® addresses corrosion abatement as part of the "cost of ownership"

ProWall® containers are considered non-hazardous waste and are recyclable.

The structures are designed to be globally stiff but locally compliant to protect the container and its contents from damage.

ProWall® ARC Containers

The containers are collapsible for economical empty storage, each with multiple end and side walls to convert to a loading ramps and can added to increase the size of the containers.

Internal Deployable Wheels, Jacks and Drawbar convert the ARC to a trailer. Interior threaded insert system allows for a variety of internal attachment configurations

Optional Container Configurations

Collapsed for Storage

Standard ARC Container

ARC Container with Double walls

ARC Container with 2.5 walls
